

ShopEasy

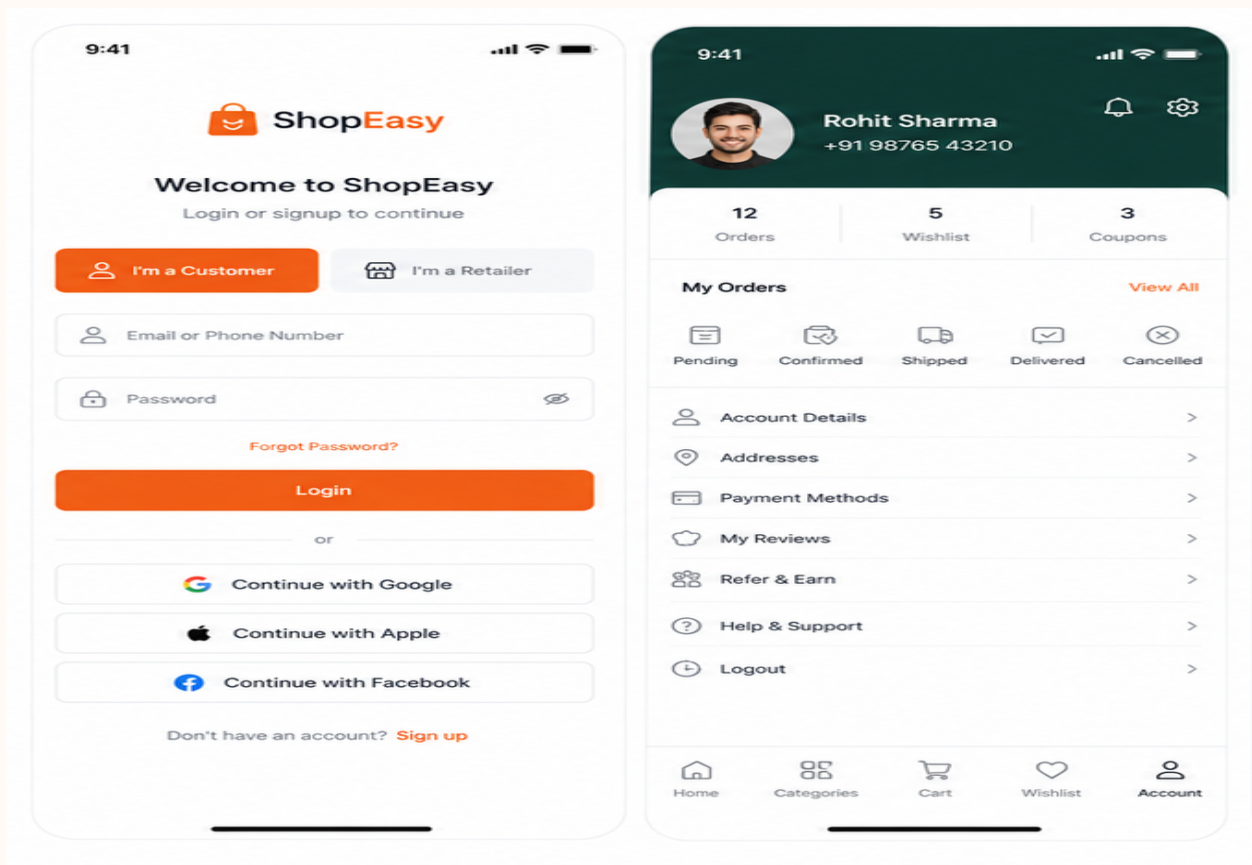

Modern E-Commerce Mobile App UI/UX Design & Full Flutter Development

A complete end-to-end e-commerce mobile solution designed and developed using Flutter for full cross-platform app development, combining premium UI/UX design with scalable mobile engineering.

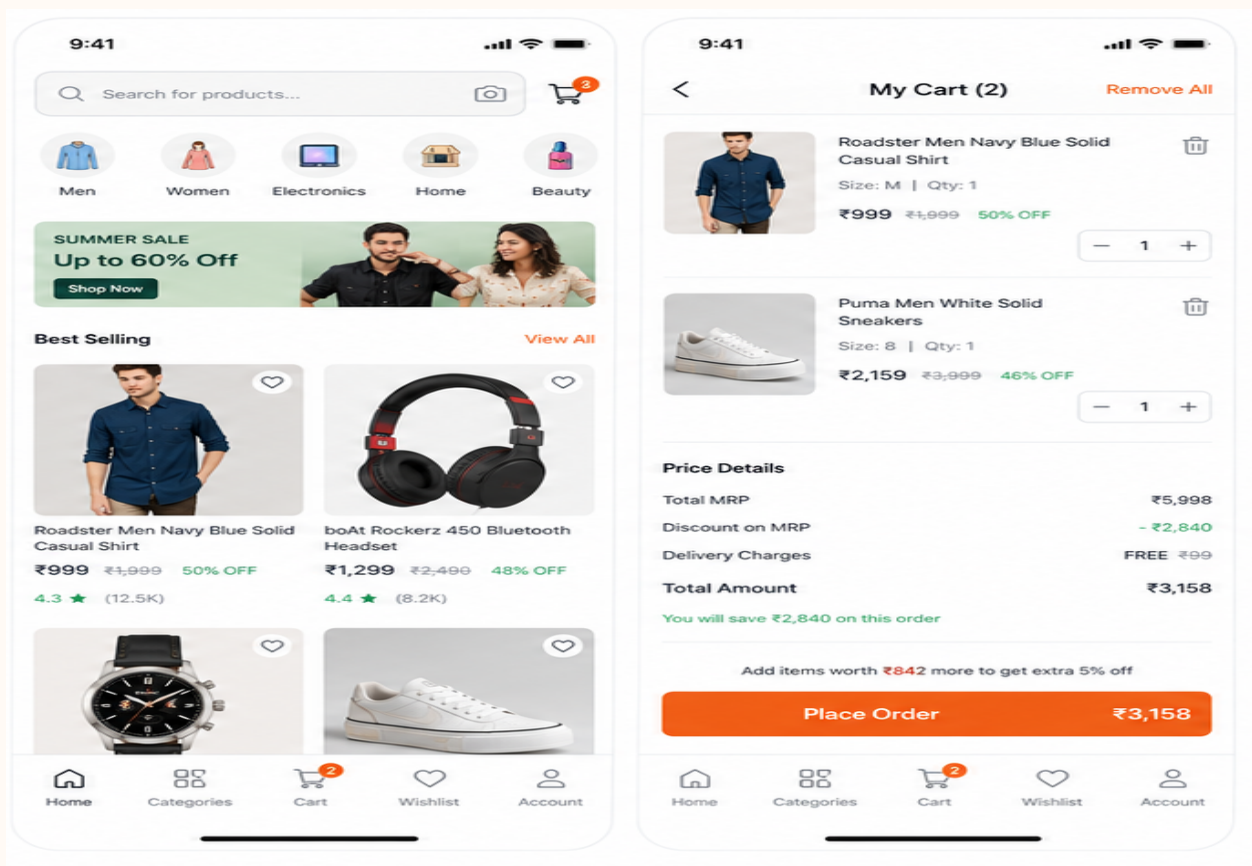

Full App Development Scope

- Complete Flutter-based cross-platform mobile app development
- Custom UI/UX implementation from concept to deployment
- Authentication, onboarding, and user account systems
- Product listing, cart, wishlist, and checkout architecture
- Responsive mobile-first design system
- Scalable code structure for future feature expansion

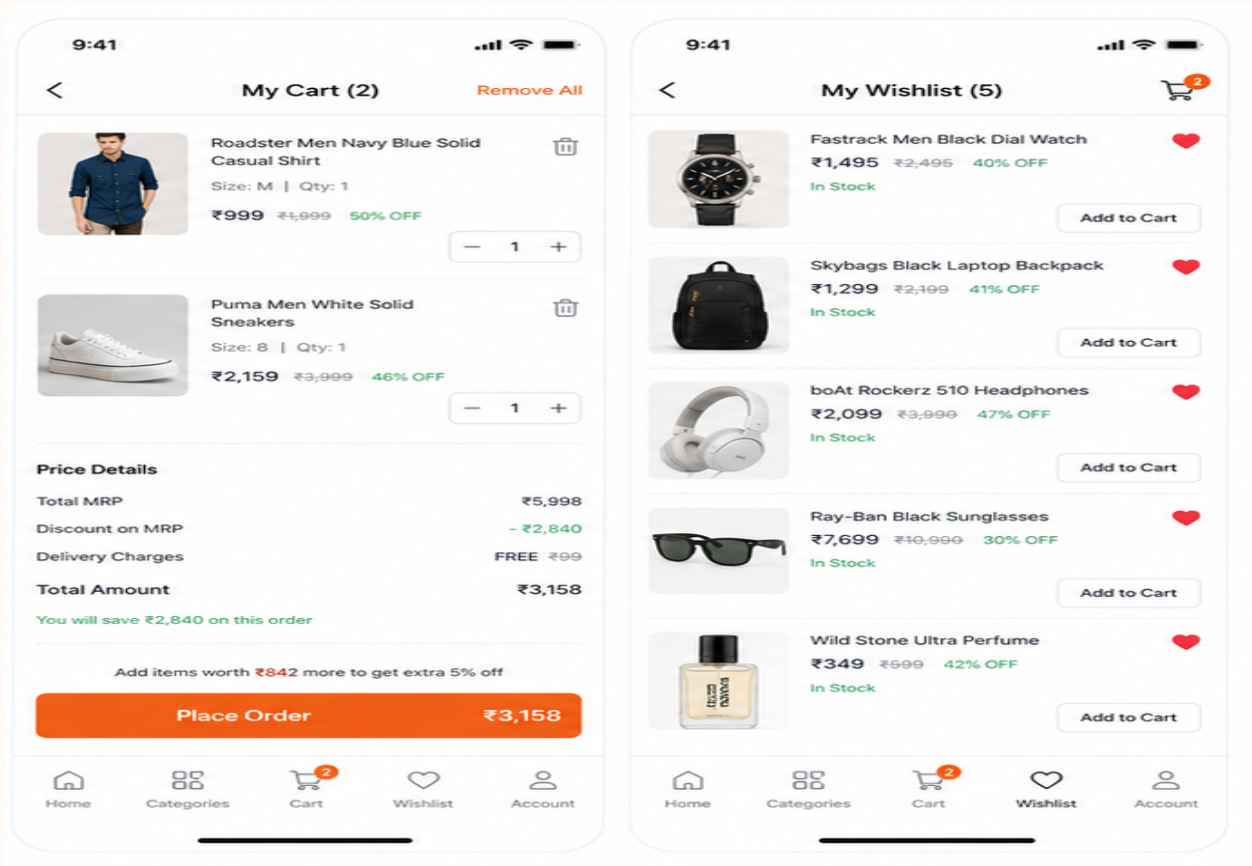

Project Highlights

- **Login & Authentication** – Customer/retailer role selection, social login, and streamlined onboarding.
- **Dashboard & Account** – Orders, wishlist, coupons, account settings, and support systems.
- **Home & Commerce** – Search, categories, banners, and product discovery optimized for conversion.
- **Cart & Checkout** – Pricing transparency, quantity controls, and seamless order placement.

Technology Stack

Flutter | Dart | UI/UX Design | Figma | Firebase/API Integration Ready | Mobile Architecture | Product Design | Cross-Platform Development

Outcome

ShopEasy represents both creative product design and full-scale Flutter app development expertise—showcasing the ability to transform e-commerce concepts into production-ready mobile applications with strong branding, modern UX, and scalable development.
